# Hair Trends in Style & Color

**S**haggy styles, pixie cuts and bobs that are very short at the nape are among the most popular trends in hair for early 2007. Hair accessories seem to be all the rage again this year as well with women spotted in everything from headbands to barrettes to silk flowers in their hair.

In terms of color, we'll see women leaning toward lighter shades rather than darker ones. Also warmer tones will be a big hit. Expect shades of red and auburn to be popular as well.

For men, expect to see shorter, clean-cut styles or shaggy styles rather than the longer, messy look that characterized season's past. Hair will be above the collar lines sporting the razor-cutting technique.

Men's color will consist of softer to warmer shades, rather than last year's bold blond highlights.

Remember that the above styles will likely arrive in several variations, so you don't have to stick with just one simple style. Find one that suits you. When in doubt, try doing a search online for your favorite celebrity to see what style he or she is sporting or hit the local magazine racks for a variety of hairstyle magazines. Another option would be to drop by your local salon and talk to an experienced hairstylist who can guide you to the latest style that is right for you. **HB**
